USER HOURS

In order to simplify the necessary resources for a live broadcast which involves bandwidth, Internet traffic and simultaneous users, we give you the viewer hour concept.

Doing the Math is now a lot easier:

1 viewer watching 60 minutes of transmission equals one viewer hour;

8 viewers watching 15 minutes of transmission equals two viewer hours, and so on;

Viewer hours are the amount of time your audience is watching multiplied by the number of viewers, regardless of current viewers. Simpler and more efficient!
